Peace came to New York out of the night. In the dark hours of the crowding dawn a siren shrilled, there was a dull hurrah of shadowy figures who tossed their hats in the air, a bell pealed and those who lay abed in the fitful sleep of anticipation awoke and said: "It's here. The paper showers, like those which coated the city white last Thursday, were seen drifting down, but they were not quite so thick. Perhaps all the of-ace waste paper and files and telephone books had been torn up last week, or perhaps the people did not stay inside long enough to tear. But all day little silvery showers of paper showed bright against the sky, and wise folks said that they had been thrown by the airplanes they had been thrown by the airplanes hovering high above the buildings.

## Fifth Avenue Traffic Closed.

Fifth avenue belonged to the people who walked and blew horns, and shooed all the firing line in France, and there is no solder in the army who has tasted one of those doughnuts after a hard pear up town, converging as they had been for hours from all sections of the city. They carried banners that expressed heartfelt sentiments about the house of Hohengollern. Unantmously they consigned Kalier Bill to Hades, which something supposed to be the Kalser was carried with mock overmony.

These same sailors and soldiers had very definite views about what peace meant to them. They also carried banners with such legends as "No more beans," "No more camouflage coffee," "No more monkey stew" and other sentiments expressive of what they fondly thought of the blooming commissariat. They were roundly cheered, although no girls kissed them, so far as an eager eyed reporter could see. But if much was made of them, even more homage was paid to the soldiers and sailors of allied countries.
